GUESS [Game User Engagement Scale Segmentation]

GUESS is an index shows by how much users engage with video games and/or smartphone/tablet games. It is calculated based on the data of "Game device ownership", "Gameplay status", and "Attitude about games".

* Children 9 and under are excluded from the data sampling.

User Category	Participation in Gaming	Explanation
Heavy gamer		The gamers have own values about playing games and don't care other people's comments and trends. Game is a part of their life and they are proud of playing games.
Middle gamer	High	Middle gamers also show a high interest in games next to heavy games and are willing to purchase games. But game is not a most favorite thing to do for them, so they don't like playing timeconsuming games except some challenging games.
Light gamer		Light gamers show less willingness to evaluate, purchase, and share games with others than Heavy gamer and Middle gamer do. They like to play casual games that satisfy their demands and are likely to avoid purchasing game apps.
Casual gamer	Low	Casual gamers show a low interest in games and are not willing to pay for them. Some have negative feelings towards games. For them, playing game is one of ways to kill time, so do not want to play difficult games.
Non-gamer		Non-gamers do not even have video game consoles. They also do not play games on mobile devices (smartphone/tablet).

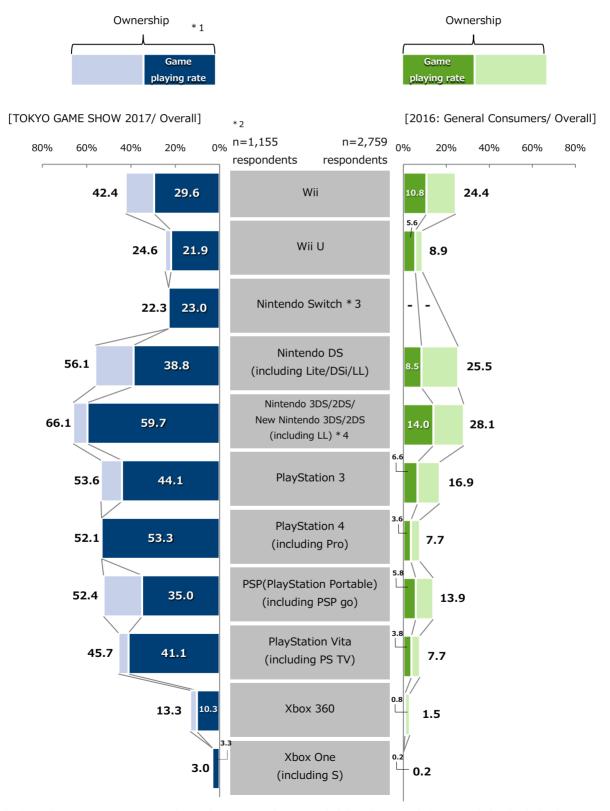

- "Heavy gamer" accounts for the highest proportion in GUESS category at 68.3%, followed by "Middle gamer" (21.7%) and "Light gamer" (4.9%).
- The ratio of "Heavy gamer" at TOKYO GAME SHOW 2017 is 47.5 points higher, while "Light gamer" and "Non-gamer" are 19.9 and 11.3 points lower each than those of "general consumers/game players".
